Subject: Semi-monthly call with PRPs

We had a call scheduled with PRPs today, and Alison Crane (BP), Sebastian Harrison (Chemours), Sathya, Randy Palacek (Parsons) and Doug Petrof attended. Since EPA was not on, I just gave a quick rundown of how many priority designs we had prepared and said that we planned to wrap up sampling either just before or just after Thanksgiving, depending on how much new access we had.

The following came up:

- Chemours wants a complete data set from Z3, I said I couldn't send, please route request through EPA
- They want to know when we will sample Z3 properties so they can split (I said either just before or just after thanksgiving, so we can keep costs separate)
- Where are we with excavations? Doug referred to his notes from a call last week and said they had done about 15 in Z3 and had started work in Z3 but had not yet completed any

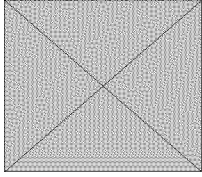

Two other things of note:

1. Somebody (not SulTRAC) is updating the status map to show sod, excavation, etc. We don't know who it is or how often it is updated, thus we don't know how accurate the map is.
2. Randy Dorian wants to remove data from SCRIBE and put it in a separate place when START/ERRS/EPA completes remediation of a property so it does not continue to appear hot when the database is queried. Since we are not tied into the START/ERRS/EPA remedial work, somebody else will have to take the lead on letting Randy know when remedial work is complete.

Thanks,
Rik
